SPORT/FLY FISHING GEAR LIST

Fly Fishermen

We have found that 6 wt rods are best for Trout and Char with 8 wt and 9-10 wt for King Salmon. Two and four piece travel rods are great. Spey Rods for Salmon and Steelhead have become very popular. Anti reverse reels are best for salmon fishing. We use mostly combination fly lines: floating lines with a sinking tip of 10 to 12 feet. Floating lines are also necessary for dry fly fishing for Rainbow and Char as well as top-water woggin' for big Silvers. The versa-tip lines are nice and dwill give you a lot of versatility on the river.

Fly Patterns and Sizes

Our most effective Salmon Patterns are large attractors: #2 up to #4/0 for King Salmon. Bright colors, Red, Hot Pink, Purple, Black and Orange are generally best. We use a lot of Mylar, Flashabou, or tinsel when tying our salmon flies. Weighted bodies or weighted eyes help the fly get down. Salmon like lots of Marabou or Bunny Fur. Char and trout wet flies should be tied on #10 and #8 hook. We have most of these flies in stock.

Alaska flies can be found at: www.alaskaflyfishinggoods.com
